ABSTRACT

Neuro-Linguistic Programming (NLP) is a part of applied science, a combination of Linguistics and Psychological Sciences which has been frequently used in various domains since 1970. Its effectiveness in responding to various situations can be seen in the scope of companies, businesses, campuses, education, marketing, health, personal life, and even the improvement of spiritual life. NLP is a powerful and useful methodology that helps us communicate effectively and get the desired results. In this research, NLP technique observations were carried out on the multiculturalism activities of Pandita/Hindu Religious Leaders in Bali. Hindu priests in Bali give religious lectures, cultural seminars, and religious and cultural rituals not only in Balinese and Indonesian but also in English. Multiculturalism activities are also carried out by various ethnic groups, religions, and citizens of the world. There are three NLP patterns used by Hindu Pandita in Bali in their multiculturalism activities: Deletion, Generalization, and Distortion. Frequently, the Deletion and Distortion techniques are most widely used. These techniques can provide benefits such as communication becoming more effective and flexible, the speaker becoming more charismatic, and listeners being curious about what kind of thoughts/views they have and having further curiosity.

INTRODUCTION

Neuro-Linguistic Programming (NLP) has been used in language teaching methods for much longer than we realize. Since NLP's introduction two decades ago, educators and lecturers have used it to combine community language learning, music, drama, and body language into their pedagogical approaches. NLP is based on the principles of neurology and psychology and focuses on the brain's functioning and how it may be trained to function better. Naturally, this concerns

left/proper brain function, multiple intelligences, visual/auditory/kinaesthetic learning styles, and other research fields that attempt to pinpoint specific learning modalities and highlight the significance of individual learning. Learning to spot patterns is at the heart of NLP.

NLP offers a model of how we communicate with ourselves and others and is also concerned with process rather than content. According to Bavister & Vickers (2004:13), among many other things, NLP assists us in identifying our goals and boosting our levels of comfort, confidence, and self-worth. The main goals of NLP therapy are to improve self-communication, lessen irrational concerns, and manage negative feelings and anxiety. In Putra (2012:37), John Grinder claims that NLP is a fast-tracked educational approach for identifying and taking advantage of patterns in the outside world. Additionally, NLP helps people become more proficient communicators in spoken and nonverbal forms.

According to Bavister & Vickers (2004: 5), language is used to code, organize, and assign meaning to our internal representations of the world (or anything that exists outside of us) and to communicate them both internally and externally. This includes all symbol systems, including body postures and gestures. The Meta Model is one of the numerous NLP strategies that can improve communication effectiveness.

We must learn and hone the skills of this Meta Model because it will help us better understand people and the issues underlying their behaviors and attitudes, recognize the things that drive our coworkers and clients, communicate intelligibly and clearly, and assist others in solving problems for themselves. Meta Models are relevant to our everyday lives and are also highly helpful in our professional lives, particularly for those of us who work in education. Gaining a comprehensive comprehension of the Meta Model can significantly improve our ability to communicate with coworkers, students, and clients in training, the classroom, and other settings.

This Meta Model can be used both offline and online. It can assist us in inspiring our colleagues to take the initiative and a sense of personal accountability, focus on finding solutions rather than issues, and be charismatic and motivating team members. We have more drive and vigor to complete our tasks and are not constrained by ideas and deeds that restrict us; we are imaginative and adaptable in how we think and interact with others and our surroundings.

A Pandita/Hindu Religious Leader in Bali is essential in a Balinese person's mental and spiritual development and personal journey. When a Pandita has the title of Pandita by going through a series of ceremonies until Dwi Jati, a Pandita must pay attention to his speech, acts, and behavior in everyday life. They become role models, prominent figures who are respected, respected, obeyed, and even followed. Until jargon is formed in society, Pandita Ratu's words must always be followed and adhered to. In Bali, there are now more and more opportunities for various castes to play the role of Pandita. With the expansion of opportunities for anyone to hold this role, the quality of a Pandita who becomes a Coachman/Spiritual Master becomes very important to pay attention to.

This study examines the strategy and implementation of the NLP Meta Model Technique by Ida Rsi Acharya Agni Budha Wisesanatha and Ida Rsi Mahadewi

Wisesanatha, who are Pandita/Hindu Religious Leaders in Bali. The focus is on their diverse multicultural activities. Naturally, we may bring the benefits of NLP to life in both our personal and professional lives by witnessing, watching, copying, doing, and even being able to teach beneficial things from the NLP strategies utilized by Ida Rsi.

RESEARCH METHOD

NLP helps improve our relationships, especially by improving communication. NLP techniques, such as the Meta Model, can also help us identify the values and beliefs that have been limiting us. Likewise, this research aims to further expand people's knowledge and opportunities, especially in education, self-empowerment, and spirituality, using language to motivate, encourage, and empower.

The general aim of this research is to determine the application and use of NLP techniques carried out by Ida Rsi Acharya Agni Budha Wisesanatha and Ida Rsi Mahadewi Wisesanatha on several videos recorded of his multiculturalism activities from 2018 to 2024. Not only video recordings but also research was carried out using live recordings of his activities in May 2024. The research results of this NLP technique can also be applied to personal life. Namely, it allows us to pay deeper attention to what people say, to whatever is in their heads that they may not even be aware of, to things that have not been expressed verbally.

In this research, the population is the multiculturalism activities of Ida Rsi Acharya Agni Budha Wisesanatha, a Pandita/Hindu Religious Leader in Bali from 2018 to 2024. Named Walaka Ir.Made Suryawan. MM, CHSP, CHA, he was born in Denpasar 6 September 1962. As well as Ida Rsi Mahadewi Wisesanatha, Pandita Istri of Ida Rsi Acharya Agni Budha Wisesanatha.

Ida Rsi Wisesanatha is one of the founding fathers of Gema Peace. Before having the title Ida Rsi, he was an alma mater of the Udayana Faculty of Agriculture Class of 1981. He continued his career in the tourism sector by serving as Assistant Executive Manager of Hilton Bali for 1 decade, from 1990 to 2000. He also served as General Manager of Santika Premiere Beach Hotel for 5 years, from 2000 to 2005. Seeing his background, it is very appropriate to use him as a research data source. Apart from his role as a Hindu priest in Bali who is, of course, respected religiously and culturally, he also has various experiences in tourism, hospitality, and public speaking. This supports the researcher's aim of providing teaching materials for these two courses.

Six videos of his multiculturalism activities were obtained and downloaded from the YouTube channel and four videos recorded live in 2024. The researcher used the observation method to meet the need for complete and reliable data in preparing this paper. Researchers used this method to collect data on six videos of Ida Rsi's multiculturalism activities from 2018 to 2023. In addition to the observation method using downloading and recording techniques, an observation method using video recording techniques of four Ida Rsi's multiculturalism activities, both Ida Rsi Wisesanatha and Ida Rsi Mahadewi Wisesanatha were carried out in May 2024. Video recording was then continued with recording techniques to present accurate and precise data results. These methods and

techniques are carried out with a crucial aim: to know the application of NLP techniques, the differences in their delivery, and the benefits that can be taken that can be applied to our daily lives and also in the professional and spiritual fields.

The next stage is analyzing the data. Data was analyzed using a qualitative approach. Downloaded and live-recorded videos of Ida Rsi Wisesanatha were observed and analyzed using the NLP Meta Model technique theory. The parts of the NLP Meta Model presented by Ida Rsi Wisesanatha are examined and checked. From all the NLP Meta Model techniques carried out, it is reclassified to see in a detailed and precise way the benefits that can be taken and even imitated in our communication, hospitality, and even public speaking systems using communication theory in NLP.

RESULT AND DISCUSSION

Six videos of Ida Rsi Wisesanatha's multiculturalism activities were obtained and downloaded from the YouTube channel, along with four videos of activities that were recorded live in 2024 of both Ida Rsi Wisesanatha and Ida Rsi Mahadewi.

1. Spiritual Multiculturalism Activity: #105 - Balinese High Priest Ida Rsi Wisesanatha shares his journey, wisdom and perspective on 2024

Description of video: This episode is one of my all time favourites! I couldn't stop asking questions to Ida Rsi Wisesanatha and as you'll hear, his wisdom is infinite and incredibly soul nourishing. Tune in to learn about: - Balinese Spirituality, Traditions & Ceremonies - What a Balinese High Priest is and what his role is - How he became a High Priest despite all odds - a unusual path - His Teachings VS Balinese Spirituality - How his teachings can be life-changing - How to connect, merge with your soul, your essence - The power and secrets of Mantras - His perspective on 2024 and what to expect from this powerful year of awakening This episode is a MUST LISTEN, it is filled with incredible teachings and deep wisdom.

2. Spiritual Multiculturalism Activity: GameChanging Guests: Ida Rsi Wisesanatha - A Spiritual High Priest GameChanger on Bali

Description of video: In this episode of the GameChangers United Podcast I'm interviewing a very special guest: Ida Rsi Wisesanatha - a Spiritual High Priest GameChanger on Bali who is changing the Game of Life by creating an international mission of Life Management Coaches And I was on Bali with him for 2 months, can you imagine! Ida Rsi is a high priest on Bali. Actually, only for 5 year officially. Although his journey started long before this (he was 20 when he started, he is 60 now). But before embodying this very specific lifestyle, he was the first sales manager for Hilton in Indonesia.

His story is so inspiring for everyone who feels like they have a strong calling in life. We all try to live up to that purpose. He embodied it in a way that is really next level. He and his family turned their lives around 5 years ago and started living the life of high priests on Bali. We talk about his story (of course) as well as the reason WHY he is so determined to do this. As we speak, he recently started building an international community of Life Management Coaches, he is about to publish his first book (Total Happiness Inside), he is the initiator of Eco for Peace Movement on Bali and... he is my spiritual guide as well as a collaboration partner for the Soul Business School we are about to launch. How we ended up meeting each other and working together? Listen to this episode full of Balinese wisdom and Dutch curiosity.

5. Spiritual Multiculturalism Activity: Sacred Water Blessing Ritual In Bali

Description of video: In this video, I share my experience trying a sacred water blessing ritual in Bali with revered Priest Ida Rsi Wisesanatha and Priestess Ida Rsi Mahadewi. This water purification ritual is known as Melukat in Bali. In Bali, Indonesia there is a deep reverence for the element of water. Here, water isn't just a resource; it's a sacred lifeline, with the power to purify, renew, and shower blessings onto those who respect it. The worshipping of water flows through every

aspect of Balinese life, particularly in the profound water purification rituals known as Melukat, which means to cleanse or to purify.

In Bali, water blessing ceremonies are more than tradition; they are a dance with the Divine, a connection to the Gods & Goddesses of the land. These rituals, guided by revered priests and priestesses are said to completely cleanse the mind, body and soul, washing away the past and inviting renewal and blessings. The sacred springs, rivers, and waterfalls of Bali often serve as the settings for these powerful ceremonies, where the community gathers to honor the life-giving force of water. In this video, we visit with revered Priest Ida Rsi Wisesanatha and Priestess Ida Rsi Mahadewi to experience a sacred water purification ritual. The High Priest and Priestess share their form of this water blessing ceremony from the Lineage of Shiva Buddha, also known as Balinese Hinduism, which is a unique blend of Hinduism, Buddhism, and indigenous Balinese traditions.

Url: <https://www.youtube.com/watch?v=gXowAS3CIsc>

Sentences using Generalisation Technique:

00.29 I believe everybody having your own unique style in doing meditation

Ida Rsi Wisesanatha used Generalisation – Universal Quantifier to state this sentence. By doing this, he intended to connect with every audience.

Sentences using Distortion Technique:

05.48 Only a specific and unique sensation which is good for you

06.45 But the most important one is

07.19 I think you are quite sensitive

This distortion technique, as mind reading is part of it, has the intention to claim the professionalism of knowing what is becoming the mind/ goal of the listener. Ida Rsi applied to part of mind reading and lost the performative method in stating his sentence.

Sentences using Deletion Technique:

02.09 Feel the sensation of your blood

06.07 Spirit is very very smart

09.35 God is there everywhere

10.03 And also seven dimensions

This deletion technique showed the deleted part of the message. It didn't give the detail what kind of spirit, where is everywhere, and what those dimensions are. This can be applied to arouse curiosity in the listener and confidence that the speaker has abundant insight.

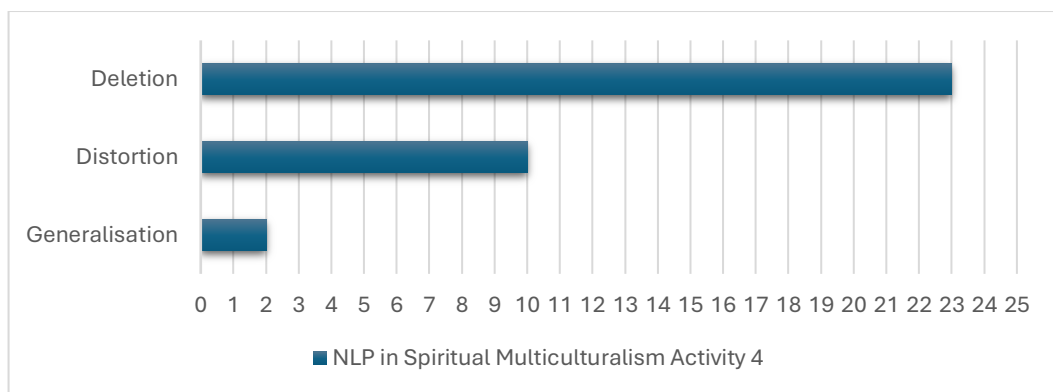

Video and transcription no. 4 Spiritual Multiculturalism Activity: Belajar Mengenal Jati Diri yang Sejati - oleh Ida Rsi Wisesanatha

Youtube Channel: Forum Studi Majapahit

Uploaded: July 2017

Duration: 05.09

Url: <https://www.youtube.com/watch?v=hmyygp5ebUU>

Sentences using Deletion Technique:

Our brain is one of our life tools.

Not just for the benefit of the body.

Live with that completeness.

The most intelligent life, the most holy life, the happy life.

The deletion technique reveals certain omissions within the sentence. The meaning of kepentingan badan is unclear. What is the definition of that word? There is currently no comprehensive explanation available for the concept of hidup yang maha cerdas, maha suci, dan berbahagia. This can pique the listener's curiosity and create anticipation for certain outcomes resulting from activities being conducted. Audiences are more captivated by the speaker's delivery.

Sentences using Distortion Technique:

If yesterday our life

It feels like being hit because we don't understand it

Our heart is the centre of our life, not our brain.

When employing this distortion technique, the speaker utilizes the process of mind reading to comprehend the events that transpired in the listener's life the day before.

The speaker employs the mind reading technique, allowing them to experience the sensation of being ditabrak.

Sentences using Generalisation Technique:

Life full of spiritual logic.

Segala sesuatunya ditentukan oleh Tuhan.

Complete tool of our life.

By such generalization tactics, one can effectively convey a sense of comprehension of the subject matter, appear authoritative, and persuade the listener to agree with and accept the speaker's propositions. These settings and circumstances are typical occurrences for humanity as a whole.

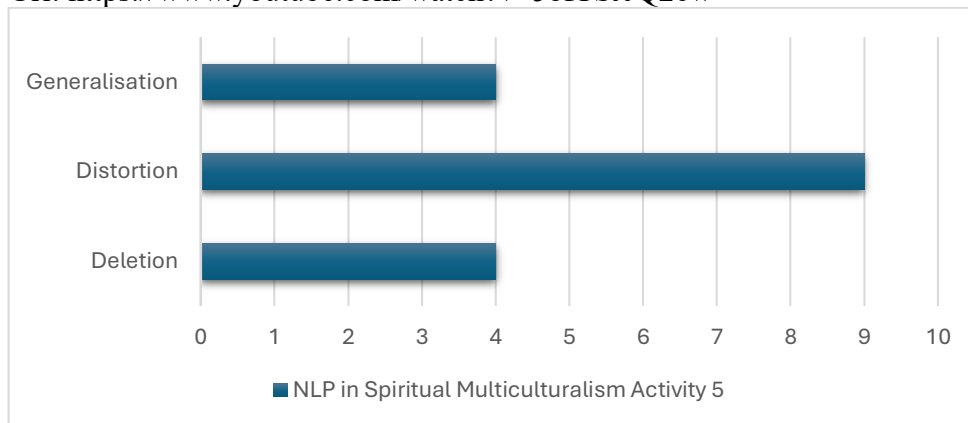

Video and transcription no. 5 Spiritual Multiculturalism Activity: Sacred Water Blessing Ritual In Bali

Youtube Channel: Sky Life

Uploaded: 21 Juni 2024

Duration: 18.48

Url: <https://www.youtube.com/watch?v=5ofTSJJQ2ew>

Sentences using Generalisation Technique:

04.49 will be understood more if we do understand the concept of incarnation and reincarnation

05.09 you will never responsible to your life

05.32 you try to control ypur mind then that will distract little

Through this technique of generalization, the speaker implies that the listener will encounter specific circumstances as a result of performing an action. Additionally, under specific circumstances, he commits an act that will destroy his existence in this world. Demonstrate that the speaker has a comprehensive understanding of the situation and the context by employing this technique.

Sentences using Distortion Technique:

04.23 I know that might be a little bit harder

06.15 Everybody will experience different things

11.36 Feel the energy coming down

The speaker's professionalism and intellectuality are referenced in the sentences that employ the distortion technique as they comprehend the listener's mind and the burden they perceive. The speaker assumes the role of an authority figure who directs the recipient to perform specific actions that are pertinent to their spiritual development.

Sentences using Deletion Technique:

02.30 Open your door to the Divine

5.55 After you really relax

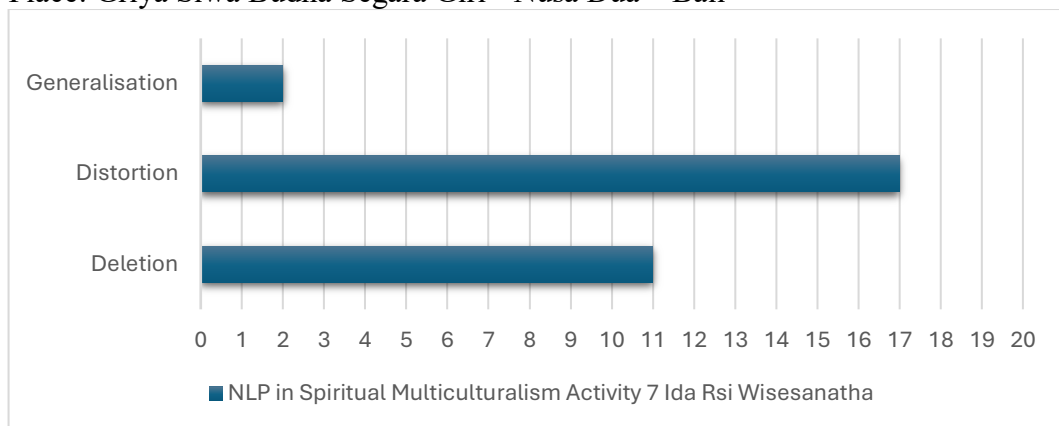

09.50 Take all those unnecessary

The speaker's sentences lack sufficient clarification. The definition, location, and nature of the term door are not provided. The phrase unnecessary refers to something unnecessary. It is important to determine if this phrase truly requires elimination.

Video and transcription no. 7 Spiritual Multiculturalism Activity – Ida Rsi Wisesanatha: Sacred Water Blessing Ritual of a Group from France

Date: 22 May 2024

Place: Griya Siwa Budha Segara Giri - Nusa Dua – Bali

Sentences using Generalisation Technique:

In general, the purpose of the exhibition is to show the world the way we live.

You never teach anything to a baby.

Generalization approaches can facilitate comprehension of the presented context and topic, making it easier for the listener to understand. By employing the concept of a baby analogy, the speaker anticipates that the audience will grasp the qualities learned from the infant. Using the term general is integral to making a generalization.

Sentences using Distortion Technique:

You know it, don't you?

The most important event today is the purification of the water.

We cannot do it for everybody.

I do believe she is connected.

The Speaker employed mind reading upon encountering the line you know it, don't you as it presupposes that the listener has already comprehended the speaker's intended meaning. However, the events that unfolded in the field were different from what was previously mentioned. The phrase most important event employs the method of distortion lost performative. Who perceives the event as significant and whether there is general consensus regarding the event as the most important.

Sentences using Deletion Technique:

We have ethics.

We have mental structures

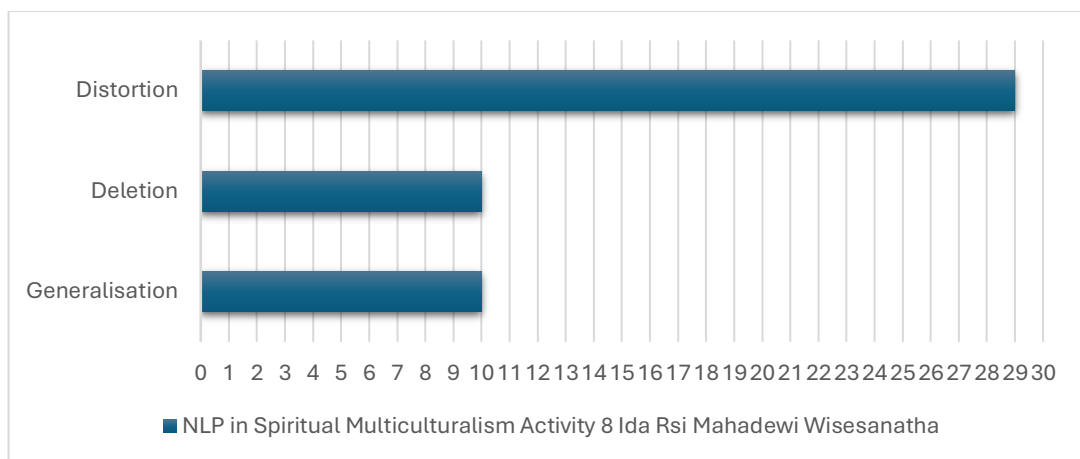

The spiritual mind, our spirit, loves to dance a lot.

The meaning of Ethics and Mental Structures as intended by the speaker, was ambiguous and without any more clarification in the statement. This aims to pique the listener's curiosity by highlighting our conceptual framework and encouraging them to engage further with the speaker's discussion on the provided topics.

Video and transcription no. 8 Spiritual Multiculturalism Activity – Ida Rsi Mahadewi: Sacred Water Blessing Ritual of a Group from France

Date: 22 May 2024

Place: Griya Siwa Budha Segara Giri - Nusa Dua – Bali

Sentences using Distortion Technique:

Going down, down, down

Release, okay, release

I am with you

It's okay

The purpose of employing this strategy is to achieve a specific objective and attain desired outcomes. In this scenario, the individual who is listening or participating in water purification intends to carry out the task as instructed by Ida Rsi Mahadewi. An external behavior is equated to some internal state.

Sentences using Deletion Technique:

Those answers

Those things

We got your energy

I am holding your hand

The speaker's comment needed a detailed explanation of the intended meanings of answers, things, and energy, regardless of whether it is the left hand or the right hand. Within the given environment, individuals will find it more manageable to comprehend and follow instructions when their cognitive processes are distorted. Mind reading technique also occurred when the speaker demonstrates the

knowledge of the answer and the intended things are meant to the participants.

Sentences using Generalisation Technique:

Take all those things

Make sure you bring all those answers

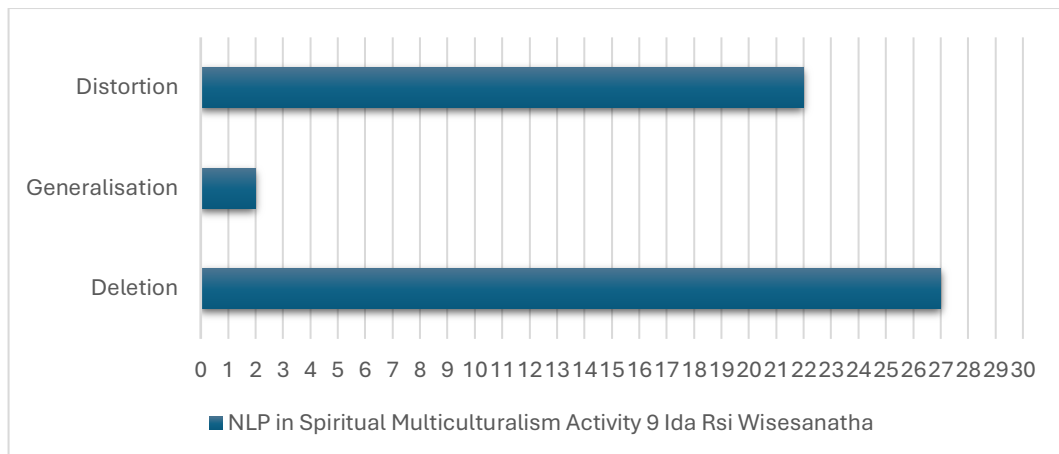

Release all those unnecessary things

Speakers frequently employ the term all to facilitate instruction in the field during water purification. It is impossible to address each issue individually due to the numerous participants and diverse concerns. This is as if the presenters and the participants had reached a consensus that all of this was a condition of their problem.

Video and transcription no. 9 Spiritual Multiculturalism Activity – Ida Rsi Wisesanatha: Sacred Water Blessing Ritual of a Group from Australia

Date: 27 May 2024

Place: Griya Siwa Budha Segara Giri - Nusa Dua - Bali

Sentences using Distortion Technique:

The most important is your heart.

What we mean is how much you love yourself

Hopefully you don't need more than 40 minutes

You are carrying your past life issues.

Distortion aims to redefine the cognitive processes within an individual. The speaker used the number 40 minutes as a marker to indicate that the participants would not require more than this amount of time. Similarly, the statement "You are carrying your past life issues" suggests that each participant possesses unresolved problems from their previous lives that they must address during the event.

Sentences using Generalisation Technique:

If there is no karmaphala then life is not just at all

Only through problem you become more creative

This sentence indicates the modal operator of necessity. The presence of karmaphala activity provides fairness in life, while the availability of the modal operator of necessity techniques allows us to be creative by overcoming a series of challenges. The purpose of generalization is to liberate the constraints of the mind. By employing this line, the speaker may go deeper into the thoughts and perspectives of the listener and the participant on the event of water purification.

Sentences using Deletion Technique:

What you may have is the internal gratitude on that

They will face the problem

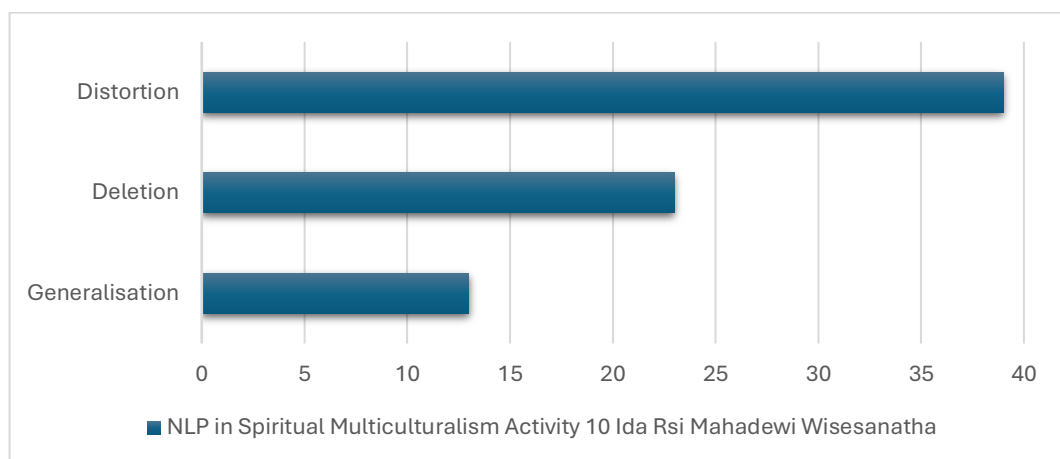

More exercise or training required for that

The goal of clarification on the deletion technique is to recover previously erased information. The speaker's intended meaning of gratitude was ambiguous as they failed to provide specific examples of the actions, timing, and locations in which it should be expressed. Similarly, when it comes to problem and training, certain information is omitted for the listener. In order to achieve a comprehensive and thorough comprehension of the subject matter, it is necessary for us to engage in further and intensive communication.

Video and transcription no. 10 Spiritual Multiculturalism Activity – Ida Rsi Mahadewi: Sacred Water Blessing Ritual of a Group from Australia

Date: 27 May 2024

Place: Griya Siwa Budha Segara Giri - Nusa Dua - Bali

Sentences using Distortion Technique:

Relax, don't think anything

Open the door and exhale

Take the breath in

The purpose of implementing this strategy is to accomplish a particular goal and obtain the intended results. Ida Rsi Mahadewi consistently executed identical phrases in each of her actions. She intended for the individual who is listening or

participating in water purification to carry out the task specified by Ida Rsi Mahadewi.

Sentences using Deletion Technique:

Now you see clearly

You can see widely

Prepare your energy

The speaker's statement required a comprehensive clarification of the intended meanings of see widely, see clearly, and prepare energy. What are the essential requirements for achieving a clear and expansive field of vision? Where is the location where we need to observe it? What type of energy do we need to prepare for the situation? Individuals in a specific context will find it easier to understand and follow instructions when their cognitive processes are altered.

Sentences using Generalisation Technique:

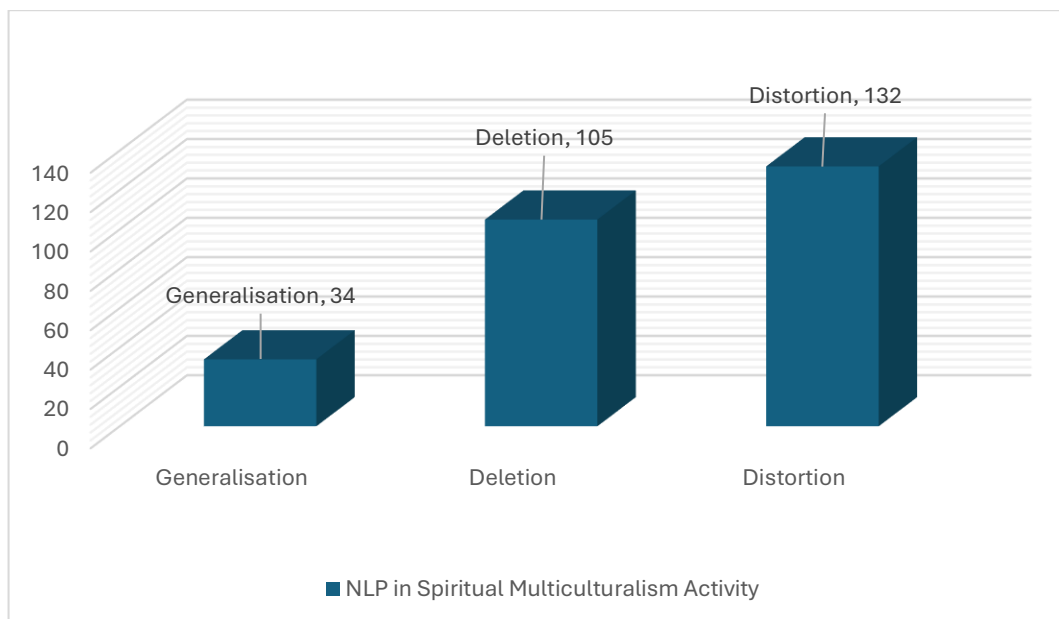

You take all those uncertain things

Seven doors all open

Okay, all doors are open

Speakers frequently employ the term all to facilitate instruction in the field during water purification. It is useful to address all the participants' contexts to create results, resulting in no choice that all have to join in and integrate together in the process.

CONCLUSION

Upon analyzing Ida Rsi Acharya Agni Budha Wisesanatha and Ida Rsi Mahadewi Wisesanatha's speech technique and style, it is evident that both Bali's Pandita possess many qualities. Examining the NLP technique can benefit both the

speaker and the listener. For the speaker, it can evoke a strong sense of curiosity in the audience and efficiently cover a wide range of discussion topics. It might offer the listener a more profound and comprehensive understanding of the content compared to what the speaker communicates in their voice. By analyzing different sentences and statements using the NLP approach, we can determine an individual's world model scheme, the circumstances leading up to their current state of affairs, and their responses and behaviors. This linguistic art encourages us to explore further how language influences our cognition and actions.

The NLP approaches that are frequently used include Deletion and Distortion techniques. Intentionally removing certain elements inside words or information in a sentence can evoke a sense of intrigue and fascination that intensifies within the recipient. This strategy can be employed to captivate our audience. Nevertheless, if not practiced adequately, this deletion approach can lead to misinterpretations due to the omission of crucial information, resulting in communication gaps between the speaker and the listener.

In addition, the two Bali's Pandita extensively utilize Distortion tactics in their multicultural activities. Effectual distortion, and mind reading can yield a professional impact, indicating that the speaker possesses extensive information and a wide-ranging knowledge base. Nonetheless, if distortion is executed unprofessionally and outside the appropriate context, it can lead to adverse consequences, such as the listener receiving insufficient information and undisclosed prejudices.

Hence, in order to implement meta-models utilizing sophisticated NLP techniques, it is crucial to establish and sustain a harmonious connection with the recipient, a task effectively accomplished by both Ida Rsis in their role as religious authorities. Intonation is essential to avoid conveying the notion that assumptions are being concealed due to the usage of generalizations. Clarity in talks is crucial to prevent misconceptions. It is essential to refine terms to prevent any offensive implications in communication. By closely observing Ida Rsi's participation in diverse intercultural activities and utilizing NLP approaches, we can gain valuable insights into effective communication strategies. The ultimate outcomes achieved will be more suitable and fitting for the intended objective.
